

Sustainability Policy

Aim: It is the policy of Oden Services UK Ltd to refurbish and reuse a minimum of 98% of collected material. Through careful planning of logistics and energy usage we minimise our impact on the environment.

Oden Services UK Ltd offers a service to our customers focused on supply of IT equipment and parts, and IT Equipment lifecycle management including recycling of end of life equipment.

We aim to:

- Deliver an environmentally sound service which prolongs the lifecycle of electronic equipment, reducing the WEEE waste stream that is committed to landfill
- Ensure our entire workforce understands environmental impact across all aspects.
- Work safely, incorporating environmental best practice, by utilising the most appropriate methods to extend the lifecycle of IT equipment.
- Try to continuously improve our services.
- Encourage the use of public transport or cycling to members of staff.
- Thoroughly vet all downstream partners to ensure environmental compliance.
- Maintain our status as an ATF enabling us to treat electronic equipment.

We seek to continuously improve our services through a system of reviews and planning to ensure our compliancy. We have documented and implemented an Environmental management system (EMS) meeting requirements of ISO 14001, to ensure the upmost level of sustainability is consistently attained.

In our business operation Oden Services UK Ltd is committed to continual improvement and we will work in conjunction with our staff and The Environment Agency to ensure the requirements of this policy are fully implemented.

Paul Seward
Managing Director
